SONICWALL

Cloud Secure Edge

Secure Remote Access Made Simple with SonicWall.

1

The Rising Threat to SMBs

43%

of cyberattacks are aimed at small businesses.

14%

Only 14% of SMBs are prepared to defend themselves.

2 in 3

attackers use stolen credentials to infiltrate networks.

An SMB cyberattack can cost anywhere from

$25K to $3M

Cybercriminals see smaller organizations as easy targets.
Upgrading remote access security is critical.

2

Why Traditional VPNs Are Falling Short

Frequent Vulnerabilities

Exploits often occur within 48 hours of a new vulnerability.

Patching can take 120–150 days, leaving SMBs exposed.

Sluggish Performance

Clunky connections slow down employees, hurting productivity.

Complex Management

Deploying and maintaining VPN clients is time-consuming, especially for limited IT teams.

3

Introducing Cloud Secure Edge

A modern, cloud-based approach to remote access starts with VPN-as-a-Service (VPNaaS).

Less Complexity

Offload secure connectivity to SonicWall and reduce manual configurations and complex patch management.

Better Security

Continuous verification of user identity and device posture, not just a one-time login.

Granular Access

Restrict each user to only the apps and resources they need.

Seamless Growth

Easily add more users and scale cloud workloads without losing performance.

4

Benefits of Starting with VPNaaS

Easy Deployment and Management

Out-of-box simple deployment with SonicWall firewalls.

Fewer headaches when rolling out to new users.

User-Friendly Experience

No more wrestling with traditional VPN clients or connections.

Fast, simple remote access for on-the-go employees.

Zero Trust Principles

- Continuously verifies user, device and application health.
- Reduces the risk of stolen credentials leading to a complete network breach.

Granular Access Control

- Limits the attack surface.
- Halts lateral movement within your network in the event of an initial compromise.

Future-Proof Scalability

- Adapts to new cloud services and expanding workforces.
- Flexible enough to grow with your business.

5

Stepping Toward Full Zero Trust

Start with VPNaaS for immediate security and convenience.

Protect your data users, and business operations at every stage.

Gradually adopt full Zero Trust Network Access (ZTNA) by enabling the rest of CSE's features, where every access request is verified and users only get access to what they need.

Ready to protect users wherever they work?
