BRILYANT

Maximize security with the largest AI-driven, integrated, defense

Unify detection and response with *Modern security operations with unified platform (SMB).*

Microsoft

An organization's ability to effectively detect and respond to cyberattacks is often hindered by siloed data, disconnected tools, and manual processes. By modernizing your security, you can unify detection and response across your entire environment.

22%
of organizations had an attack path identified in the cloud[1]

11%
of small and medium-sized businesses (SMBs) use AI-powered solutions to stop modern attacks[2]

67%
of all phishing attacks utilize some form of AI[3]

AI-powered threat detection for SMB security

Quickly detect and remediate threats with AI-powered tools from Microsoft security, designed for SMB. The security solution maximizes visibility and automatically hunts for malware with threat-intel-driven insights. Autonomous AI and generative AI-powered analyst services disrupt attacks before they escalate. Microsoft Security solutions help your people respond to incidents in minutes instead of hours.
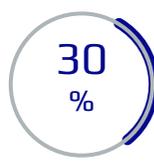

80%
reduction in incident response effort[4]

30%
Improvement in data security[5]

30%
reduction in time to investigate and remediate threats[4]

30%
increase in tasks completed[4]

We're a Microsoft partner with in-depth experience with security. Let's discuss a customized cloud protection plan for your business.
