

# Simplify Mac at work

*Streamlined Mac management and security for IT*

**Managing Macs with Windows-centric tools slows IT teams down. Manual setups, fragmented workflows and limited visibility increase operational effort and make it harder to maintain consistent security.**

With an Apple-first approach, IT teams can streamline Mac management while maintaining strong security. Automation and native workflows reduce manual work, improve visibility and support consistent security and compliance as environments scale.

**With Jamf for Mac, IT can:**

**Streamline Mac management** and security under one platform.

Eliminate **Windows-first** security challenges for Mac users.

Give Security teams the insights they need and keep the **Mac experience native**.

Increase **productivity** and **reduce risk**.

# Jamf for Mac Capabilities

**Endpoint Compliance**
